ART & CANDLE

Candles are the new flowers

While flowers assorted our most important moment in life: from birth and romance to marriage and procreating, there is only one comparable modern-day object that mystically embodies the same symbolism: scented candles.

In a noisy world where a new awareness is arising, scented candles have become a companion in our most fulfilling and luxurious quest: stillness and calm.

Calming Park presents from February 5th – 20th 2010 the exhibition "Art & Candle" at Holm, Zürich. A selection of CALMING PARK candles will be available for purchase in the boutique.

The work of seven internationally renowned artists, reveals how the stillness and calm of scented candles meet luxury, fashion, music, spirituality, graphic and visual arts.

ART & CANDLE

KRISTINA DRYZA

Kristina Dryza is a contributor for CNNGo, t5m.com, the David Report and has her own column on Asia for the World Entrepreneur Society.

She is also a Business Ambassador for the State of South Australia, a concept designer and consumer trends expert who lives in Tokyo - though belongs to the world. Her work helps companies make the imagined future real by translating emerging trends into new products, services, spaces and experiences.

Kristina Dryza loves any and everything related to the 'style of living'.

THE PROJECT

"For the Art&Candle project, I was inspired by the nature of light and shadows in people's personalities. Only when we can see and accept shadows and light in all people, circumstances and situations do we have any hope of becoming whole.

We're so fractured, especially in how we direct our attention, I thought a sunken hearth in the home could be one way to bring us back into focus."
